

Carton Packing Machine™

Automatic packing machine for fish block carton packing, for use both on land and at sea.

How does it work

A compact packing machine for fish blocks compatible with "sjaktel cartons" (flaps and lid integrated). The machine can be equipped with integrated automatic gluing of end flaps or with a separate strapping machine coming after. Included is a magazine containing up to 300 carton sheets for automatic infeed.

Benefits

- All materials are stainless steel or with corrosion resistant properties.
- Bypass function for direct transport of blocks without cartons.
- Can stack multiple layers of blocks in one carton
- Compliant with homogenous material recyclable cartons.
- Designed for in-line placement but can optionally be arranged in 90-degree lines as well.

Main specifications and options

- Machine LxWxH: 2900x1080x2000.
- Capacity 10-12 blocks per minute.
- Standard block 530x530 .
- Other sizes available upon request.
- HMI userface and stand-alone control cabinet included.
- Power consumption 3,5 kW, 3x380-440V, 50/60Hz.
- Air consumption: 1200 NI/min / 6 bar.
