

Desalting Tank for Cod™

The Desalting Tank for Cod allows the desalting process of the cod to be carried out automatically and by monitoring parameters such as: Temperature, Salinity and PH of the water. Includes a recipes configurator to have different process parametrization for different pieces of the cod. Likewise, depending on the parameters monitored, the system can make decisions to optimize the desalting process.

Benefits:

- Batches processing.
- Different types of loading/unloading systems, depending on customer requirements.
- Can used for cephalopods and shrimps (multiproduct).
- Robust and modular design.
- User friendly interface with recipes configurator for different kind of products included.
- Semi-Automatic Cleaning Process included.
- Capacity up to 1.000kg/tank.
- Alarms notification system by email included.
- OPC-UA connection included.
- Include: Traceability system reporting all the parameters during the process per each batch number and saved them in a database.
