

# Optilice™

Optilice is our own unique product for removing sealice from salmon and trout without using chemicals or medicines. Optilice uses only tempered water and a combination of flushing under and over water-level to remove the parasite sealice (*Lepeophtheirus salmonis*) and (*Caligus elongatus*).

## BENEFITS

- No need for harmful chemicals.
- Great for the environment.
- High capacity.
- Gentle on the fish and very low mortality.
- No lice returns back to the sea.
- No damage to the fish mucus.
- Removes 98 % of the sea lice.
- Optional temperature (chilled or heated).
- Operator control:
  - ⇒ Pump speed.
  - ⇒ Temperature.
  - ⇒ Holding time.

The system can be delivered with different levels of control systems, ranging from basic local control system to integrated control system with automatic report generators and cloud connection for data storage. Remote support is possible for all options.

## THE OPTILICE UNIT
