

Semiautomatic Weighing System™

The Semiautomatic Weighing System is used to continuous and controlled batch weighing with fresh or frozen product in bulk. This solution supports the batching with the help of the final weight adjustment by an operator.

- Continuous process.
- Can handle fresh or frozen product.
- User friendly interface.
- Robust, compact and modular design.
- Hygienic design.
- An operator can control and weigh up to 2.500kg/h.
