

## SPECIFICATIONS

Material	Stainless steel aisi 304/316
Outlet flange	4"
Acid dosing	Standard dosage pump
Control cabinet	Stette software
Standard equipment	Fork lift pockets/lifting lugs

MODEL	GRP 3500 FISH	GRP 3500 SMOLT
PUMP	FS3152	FS312
POWER KW	13	5,9
VOLTAGE	3x230/400	3x230/400
VOLUME	3500	3500
ACID DOSAGE	Yes	Yes
PUMP FUSE	45/32 amp	32/25 amp

## GRP 3500 ENSILAGE UNIT

Ensilage unit with integrated grinder and circulation pump is an effective solution for making ensilage in the fishing industry.

Ensilage unit with integrated grinder and circulation pump is an effective solution for making ensilage in the fishing industry. The ovale shape of the tank make a optimal circulation in the ensilage with no dead points that can cause problems.

GRPG has a powerful grinder pump to grind, circulate and unload the tank. The system includes an automatic dosage pump for formic acid. The dosage pump secures the right Ph level in the tank, and is a secure way of handling the acid for the operators.

The inlet is as low as possible to make the loading easy, and the hatch is large to prevent spill when filling the fish into the tank. The tank is easily filled with 1000l standard bins. The outlet is equipped with a 4" valve.
