

SPECIFICATIONS

Material	Stainless steel aisi 304/316
Control system	Stette standard software with protection
Funnel	App 200 l with lid and gas sylinder

GRINDER GS 100

The GS 100 is used to speed up the grinding process on traditionally ensilage tanks with pumps or rotating knives

The grinder crushes the fish into a coarse mix which gives the ensilage system higher capacity and better quality on the ensilage.

The GS100 is equipped with software to easy operate the machine, and the best safety for the operators. Stainless steel design give the user a clean and longlasting machine with low maintenance cost.
