NET WINCH

Optimar's Net Winch are used for Net loading and unloading to and from the Imregnator and the Dry Drum.

The Net Winch can take up to 200 square meters Net on the upload. And the Winch can be driven in many directions under the control of one operator. The design is strong and long-lasting with a minimum of maintenance. We deliver the lifting systems with electrical power, complete with control steering system. The product is CE approved and certified.
