

SPECIFICATIONS

Capacity, depending on pallet height:	15-20 tons/hour
Carton size:	Max 1080x530x100 mm
Pallet dim:	US 1000x1200 mm + Europall 100x1000 mm
El. power required:	Approx
Material:	Stainless steel and Al
Control system:	PLC
Press air:	7 bar
Air consumption:	200 NI/min

PALLETING UNIT - SINGLE BOX

Developed to pallet blocks from vertical freezers

- Developed to pallet blocks from vertical freezers
- Operating with carton or with out carton on blocks
- Fully automatic, with pallet magazine and plastic wrapping
- Capacity 15-20 tons/hour depending on height of pallet
- Can be adapted to fit most existing factories
- Reduces the manning in factory by 4-6 operators

Together with OPTI Freeze System, Optimar plastic sealing machine and Optimar packing machine and plastic feeder, the packing and palleting of fish will be efficiently executed.

- Conveyor for blocks
- 1 pcs accumulator station
- Carton stacker arrangement
- Pallet magazine/stacker
- Plastic wrapping machine
- PLC system
- Man-machine communication via operator`s panel
- Roller conveyor for emty pallet
- Roller conveyor for completed pallet
