PALLETIZING HOTEL

The Palletizing unit is designed to meet the requirements of the salmon industry regarding durability, reliability and hygiene

The Palletizing unit is designed to meet the requirements of the salmon industry regarding durability, reliability and hygiene. The customer defines which shelf each type of fish are going to be accumulated. When the shelf holds 27 boxes, it is ready to palletize and when ready the palletizing unit lifts 3 and 3 boxes to the waiting pallet in pattern 2+1,1+2. The capacity on the inlet make sure that the palletizer can work with an even pace.

This ensures a steady flow of pallets to the outlet.

- Superior capacity
- All stainless design
- Possibility for order packing
- Easy to expand
- Palletizing according to order, quality, weight etc.
- PC interface to pms
- One loading point, one unloading point
- Unlimited number of grades
